T··Mobile·

G1

with Google

Features Included in the T-Mobile G1™

Touch Screen
T-Mobile G1 lets you touch, tap, swipe and scroll your way through all the coolest applications, your contacts, the Web and more. That means instant access to your information with a touch of the finger.

- Tap the screen and go
- Instant access to key information

QWERTY Keyboard
Together with the trackball and touch screen, the QWERTY keyboard makes it easy to get around the Web, type e-mail and respond to texts. Just flip the phone horizontally, slide open the keyboard and you're ready to go.

- Type messages easily

One-Touch Google Search
The quickest way to get results. We've put the Google search bar just one touch away so you're never far from an answer when you have a question. You can even search within your applications using the related search function. Listening to music? Search your music files.

- Search the Internet in one click

Real Web Browsing
The T-Mobile G1™ was built to browse the Web. Using the touch screen, QWERTY keyboard and trackball you can access your favorite pages and browse like you were sitting at your computer.

- Access in one touch
- Real Web, not mobile version

Easy Access to Google Apps
Gmail™, GoogleTalk, Google Calendar, YouTube™, and even Google Maps are all easy to access and move between on the T-Mobile G1.

One-touch access to:

- Google Maps (My Location, satellite, traffic and Street View)
- Gmail
- YouTube
- Google Calendar
- Google Talk

3G Network and Wi-Fi Access
Not only can you navigate the real Web, you can do it at blazing speeds! Seamlessly moving between available 3G Network and Wi-Fi access, the T-Mobile G1 gives you the Web when you're on the go.

- High-speed 3G network
- Connect to open Wi-Fi networks automatically
- Also works on 2G and EDGE networks.

IM/Text/E-mail
Sign in once with your Gmail password and your GoogleTalk, Gmail and Google Calendar are kept up to date. Add in texting and you're ready to leave your computer without worrying about being out of touch with your contacts. Have more than just a Gmail account? No problem. You can access other e-mail accounts right from your T-Mobile G1.

- Connect while you're on the go
- Access additional e-mail accounts (Hotmail, Yahoo!, etc.)

3.2 Megapixel Camera
With a capable digital camera built in, the T-Mobile G1 lets you capture high-quality photos of the moments that matter most and share them with friends. And with 1GB of memory (expandable to 8GB) you can afford to capture a lot of moments. It also features autofocus built in and a shortcut button to the camera on the side.

- High-quality photos
- Autofocus

YouTube Videos
With millions of videos from YouTube at your fingertips, you can find that funny video you were trying to tell your friend about and show it off from wherever you are.

- Millions of videos
- Access anywhere

Music Player
With the included 1GB memory card that you can expand to 8GB, you can listen to your music with the built in music player or on any computer. That means you're never without your favorite tunes, no matter where you go.

- 1GB memory card included
- Expandable to 8GB

Android Market
Download the hottest applications from Android Market - just one touch away. With games, social networking, on-the-go shopping applications and more, you'll get more done and get it done on your schedule. The possibilities are endless.

- One-touch access
- Games, social networking, on-the-go shopping and more
- Download wirelessly

Customizable Home Screen
Shuffle around your applications. Create wallpaper from your photos. Whatever you access most, or want to see everyday can be put front and center so your T-Mobile G1 is as unique as you are. It's all up to you.

- Drag and drop your favorite applications, photos or folders
